

# # 3C-K5P4

Cold protection

## TECHNICAL CHARACTERISTICS

Seamless Liner / Glove  
THERMOLITE® knitting  
Elastic wrist | Ambidextrous  
24 grams weight  
Manufactured in Canada

SIZES : 7. 8. 9. 10.

PACKAGING : Dozen | 72 pairs/ box

## BENEFITS

- Repels humidity = Keeps your hands dry
- **Warmer than wool** | Cold resistant
- Adjusted | Comfort
- Light and great dexterity
- Ambidextrous
- Removable liner

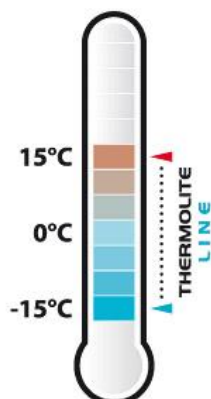

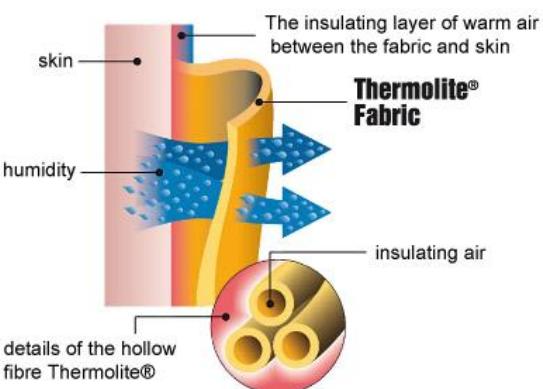

## APPLICATIONS

- All works requiring northern cold protection
- Automotive industry
- Food processing
- General handling
- Industrial manufacturing

## COMPONENTS

THERMOLITE® provides warmth and comfort without weight even when wet. Inspired by Mother Nature of how Polar Bear's fur actually contains thousands of tiny air pockets for greater insulation, the same concept is embedded with hollow-core fibers that traps air just like it for excellent insulation.

Thermolite insulation contains hollow-core fibers with a larger surface area than other fabrics. That quality is designed to speed the process of moving moisture from skin to the fabric's exterior surface so it can evaporate at an accelerated rate. Even when Thermolite is wet, it reportedly continues to keep its wearer warm and doesn't add excessive weight.
